EDITORIAL

DEAR READER,

We can already feel the arrival of spring 2023, and we are looking forward to it. Homemade pizza continues to be immensely popular. Mustang offers a wide range of products for both pizza novices and professionals. Our new product for the spring is the ceramic, wood-heated Dome. Vesuvio 12, Vomero 16 and the renewed Napoli, presented earlier, will continue in the range. When it comes to pizza-making supplies, we are proud to say that we have the most extensive selection in this category, too. We offer all supplies you could want for making pizza.

During spring 2023, some of our dealers will start carrying the Pizzanpaistajat by Mustang pizza supply range developed with the Pizzanpaistajat pizza makers' association. These products have undergone rigorous testing and contain unique features, such as the nanocoating on pizza spatulas.

During the spring and summer, we will focus on camping and enjoying spending time together in the wild. We will therefore be presenting Mustang's wide range of camping grills and supplies in our magazine.

You should keep the magazine and take it out again in the fall. It will contain information on Mustang's wide range of stoves and fireplace supplies. We will enjoy the warmth and beauty of the flames of the fireplace together. Do not forget about Mustang's wide range of fire pits, allowing you to enjoy the therapeutic properties of outdoor fires.

You may want to pick up Mustang's new consumer brochures when shopping. They contain excellent tips and recipes for grilling, making pizza or even making smoked dishes. In spring 2023, a new Mustang Kamado catalogue will be available in stores.

At the time of reading this, Mustang will have been featured with a pizza department in the Formex fair in Stockholm for the first time. You can sense the Formex atmosphere in Mustang social media posts.

We wish you a pleasant and delicious grilling spring and summer 2023!

Sami Sinisalo
Brand Manager

Versatile pizza oven

The pizza oven is not just for making pizza

In addition to perfect pizzas, you can use the pizza oven to cook vegetables, steaks, bread, buns, pies, and virtually anything that requires a high temperature.

Mustang Vesuvio 12 and Vomero 16 are not just simple pizza ovens. Just as the Napoli and Dome models, Vesuvio and Vomero can be used for other types of cooking as well. Just replace the pizza stone in the pizza oven with a griddle pan (316743) and the oven becomes ideal for frying steaks and vegetables.

Napoli is an excellent oven for cooking other foods as well. Napoli and Dome can fit larger cast iron pans and pots. How does a Dutch oven bread with a slight smoke aroma sound? Or how about Italian style meatballs in tomato sauce or slowly braised mutton shanks?

Delicious recipes mustang-grill.com

The sky is the limit:

Mustang pans and pots:
325435 **cast iron pot,** 327531 **cast iron pan set,**
603435 **cast iron pan,** 603438 **cast iron wok pan,**
316743 **cast iron pan**

Mustang Dome (610603)

Mustang Dome is a wood-burning pizza oven made from ceramic mullite clay. Many know mullite clay from Mustang Kamado grills. The clay withstands huge temperature changes and stores heat. A perfect combination for a pizza oven!

Burn wood evenly on the floor of the pizza oven until the oven is heated up. After that, move the embers to one side of the oven, and the oven is ready to bake some amazing pizzas. Place a log on top of the embers to create a flame as it burns. This flame will travel across the ceiling of the oven to the other side, where you bake your pizzas. The flame cooks the pizza toppings. The wood-burning oven gives your pizzas a wonderful smoky aroma. You can bake your pizzas directly on the floor of the Dome oven (provided that you carefully clean it of ashes) or on a separate pizza stone. Mustang Dome comes with a long cleaning brush for cleaning the oven floor without having to worry about singeing your arm hairs.

Mustang Napoli (328213)

Mustang Napoli is a large and impressive-looking stainless-steel wood-burning pizza oven. It is a veritable king of the garden and every pizza enthusiast's secret daydream.

The bottom part of the Napoli pizza oven has been completely redesigned. Thanks to the new structure, the floor of the oven now consists of one level area. This makes it possible to bake pizzas directly on the oven floor. The door and the chimney of the oven have also received technical improvements.

The shelf and the bottom level of the Napoli trolley are excellently suited to storing firewood, eliminating the need for a separate rack for wood. The large side shelves of the trolley can be used for handling a pizza next to the oven.

Mustang Vesuvio 12 (608192)

Mustang Vesuvio 12 is a gas-operated pizza oven that satisfies your cravings quickly. Its 2 cm thick pizza stone stores heat and bakes perfectly crispy pizzas. Thanks to its thickness, the stone stays hot for a long time. This lets you you can bake one pizza after another in the Vesuvio oven without having to worry about reheating the stone.

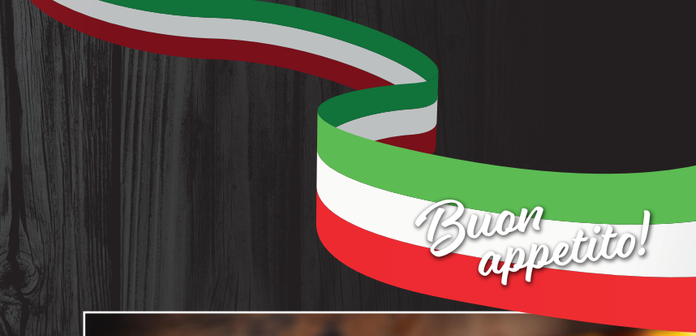
The U-shaped burner bakes the pizza from three sides simultaneously. Rotate the pizza a couple of times in the oven to make sure the crust is baked evenly. The burner is guaranteed to be powerful enough to work in winter conditions. The oven's maximum temperature is 500 °C, but you can bake your pizza at lower temperatures. Don't dawdle – your pizza will be ready in about 90 seconds!

Mustang Vomero 16 (610626)

A gas-operated tabletop pizza oven with a flame resembling that of a wood-burning pizza oven. Impossible? Not with Mustang Vomero 16. The oven has a very powerful burner on the right side, creating a sea of flames in the ceiling that cooks your pizza toppings in an instant. Normally, flames like this can only be achieved with a wood-burning pizza oven.

Vomero's 2 cm thick cordierite pizza stone stores heat and bakes perfectly crispy pizzas. Thanks to its thickness, the stone stays hot for a long time. This lets you you can bake one pizza after another with Vomero without having to worry about reheating the stone. The temperature of the oven quickly rises to over 500 °C, cooking the pizza in an instant. You need to have quick hands as you rotate the pizza in the oven.

TREATS FROM THE PIZZA OVEN



SCAMPI PANS IN THE PIZZA OVEN FOR TWO

- 12 shelled uncooked scampi
- approx. 100 g butter
- 2–3 cloves of garlic
- zest of one lime
- 50 g parmesan flakes
- salt and black pepper
- 2 slices of toast
- 1 dl chopped spring onion for decoration

Thaw and drain the scampi thoroughly. Melt the butter and add grated cloves of garlic.

Season the scampi lightly with salt and pepper and place them in a greased escargot pan or other oven pan. Please note! Check the heat endurance of the pans. Spoon garlic butter on the scampi and top with grated lime zest. Finish with an even layer of parmesan flakes.

Grill the scampi in the pizza oven for approximately 3–5 minutes at 200–220 degrees. Toast the bread and cut into triangles. Sprinkle with spring onions and serve the scampi hot!

WOW YOUR FRIENDS WITH A SWEET PIZZA

DESSERT PIZZA

- 1 pizza base
- 100 g Nutellaa
- 5–6 fresh strawberries
- marshmallows and icing sugar

Bake the pizza base from a ready-made frozen pizza ball or self-made pizza dough. Bake the pizza base in the oven as it is without any toppings. Let the base cool down for a while and cut the base into 6 to 8 sections. Brush Nutella onto a slice of pizza and decorate with strawberry wedges and marshmallows. Add icing sugar through a dense sieve just before serving!

SIRLOIN STEAK IN THE PIZZA OVEN

- 2 beef sirloin steaks á 180 g
- 1 dl oil for frying
- 50 g butter
- 1 garlic bulb
- a few sprigs of rosemary
- salt and black pepper from a grinder

Take the steaks out of the refrigerator well in advance. Heat the pizza oven to about 250 degrees. Place a cast iron pan or pan in the pizza oven to warm up. Cut the top of the garlic off and add a dash of oil on top. Season with salt and pepper.

Remove the pan from the oven when it is hot and add oil to the bottom. Place the steaks and garlic into the pan and put the pan back in the oven. Grill the steaks for approximately 1–3 min on each side, depending on the doneness you want. Add dabs of butter to the steaks when turning them and season the steaks with salt and pepper. Add the sprigs of rosemary at the end when you remove the steaks from the oven. You can finish by spooning the mix of oil and butter onto the steaks. Let sit for a moment before serving. Serve with creamed potatoes and oven-roasted root vegetables, for example!

The world`s best pizza is now made at home!

MUSTANG`S ENTIRE PRODUCT RANGE BEGINNING ON PAGE 38 AND AT mustang-grill.com

Buon appetito!

THE WIDEST RANGE OF PIZZA ACCESSORIES

Mustang pizza-oven trolley (610604)

The Mustang pizza oven trolley is designed to withstand high weights, making it an excellent accessory for the Dome pizza oven. It features fasteners that keep Dome in place as you move it. Of course, the trolley is excellently suited to smaller pizza ovens as well.

Mustang pizza oven for gas grill (313247)

With this pizza oven, you can turn any gas grill (that the pizza oven fits) into a genuine pizza oven. The structure of the pizza oven is designed to absorb the heat of the gas grill and focus it into the pizza stone of the oven. When the thermometer of the gas grill shows a temperature of around 250 °C, the temperature inside the pizza oven will be close to 400 °C. The pizza stone of the oven gives you a crispy pizza crust, while heat reflected from the ceiling cooks the toppings.

Pizza-oven-cleaning brush (612116)

Pizza ovens and stones require regular cleaning. Extra flour has to be wiped off the stone to prevent it from burning on. Mustang's pizza-oven-cleaning brush with a folding handle is made for precisely this purpose. It also features a scraper at the end, with which you can scrape off any tomato sauce that has splashed onto the pizza stone.

Mustang pizza kit (604024)

The Mustang pizza kit is the perfect choice for a novice pizzaiolo or an excellent gift, for example. The kit comes with a pizza spatula with a folding handle, a Ø 32 cm pizza stone and a rolling pizza-cutter.

All pizza accessories page 86

Mustang pizza spatulas

To bake a perfect pizza, you need a pizza spatula for placing the pizza in the oven and taking it out. Mustang has an extensive range of pizza spatulas. The pizza spatula with a folding handle **(274191)** takes little storage space. Also, our spatula with a long handle **(605911)** has gained a lot of popularity.

Premium pizza spatulas have a coated and perforated surface. This significantly decreases problems with the pizza dough sticking to the spatula. Thanks to their beveled edge, the spatulas slide easily under the pizza. The perforation also efficiently removes loose flour from the bottom of the pizza. The premium-range pizza spatulas are available in three widths, to suit differently sized pizza-oven doors and pizza stones. Widths are 30 cm **(612118)**, 33 cm **(614798),** and 40 cm **(615095)**.

The pizza must be rotated in the oven as it bakes, to guarantee even cooking. The best and easiest way to rotate a pizza inside the oven is to use a so-called rotating spatula. Mustang is now launching a premium pizza-rotating spatula **(612121)** with a Ø 18 cm peel.

The Mustang bamboo pizza spatula **(612094)** is an excellent tool for handling a pizza. You can use it not only to place pizzas in the oven and take them out but also as a cutting board and a striking serving dish.

612094 **bamboo pizza spatula,** 612121 **turning peel premium,**
614798 **pizza spatula premium,** 605911 **pizza spatula long**

Mustang rising boxes (S 612123, M 612122, L 611926)

Making a pizza dough is an art. For a perfect dough, the required rising times depend on whether you let the dough rise quickly in a warm environment or slowly at a cooler temperature. Both methods are correct.

The dough needs a container for rising. Mustang is introducing rising boxes designed for this purpose. They are made from food-grade plastic, meaning that you can apply olive oil to them without having to worry about harmful compounds being released from the plastic into the pizza dough. Also, the corners of the boxes are rounded to prevent the dough from sticking to them.

These rising boxes are available in three sizes. The size S rising box **(612123)** is intended for one large dough ball or two smaller ones. The size M rising box **(612122)** comes with a lid and can easily hold 12–15 dough balls, depending on their size. Boxes in the M size class can be stacked on top of one another. The size L rising box **(611926)** consists of two stackable boxes and a lid. With this combination, you can already run a small pizzeria.

The S and M rising boxes fit in a normal household fridge. The L box requires a larger fridge or a cold room. All the rising boxes are suitable for other food-storage purposes too.

Mustang dough spatula (611859)

With the Mustang dough spatula, you can easily turn and chop your pizza dough or lift risen dough balls out of the rising box. The spatula is suitable for other baking-related purposes also.

611859 **pizza dough spatula,**
612122 **pizza dough rising box M and lid,**
612123 **pizza dough rising box S and lid**

All pizza accessories page 86

Mustang digital scales (615272) (611861)

A perfect pizza dough requires measuring all the ingredients precisely. Mustang's product selection features two scales for this purpose. The digital pizza scale **(615272)** is the perfect choice for a pizza-maker. It has two separate measurement areas. The smaller area is intended for high-precision measurements. Its measuring range of 0.01–500 g is suited particularly well to measuring dry yeast. The measuring range of the larger area is 0.5 g–5 kg, intended for measuring flour and water. Of course, the use of the scale is not limited to measuring pizza dough ingredients. The scale is suitable for measuring any cooking ingredients. The Mustang kitchen scale **(611861)** is highly suitable for measuring flour and water for making a pizza or other dough. Its measuring range is 2 g–5 kg. The scale is suitable also for measuring other cooking ingredients.

615272 **digital pizza scale**

Mustang pizza stones

Mustang has a wide selection of pizza stones, in various sizes, to suit every need. Made of cordierite, the pizza stones store heat well and give you a crispy crust. The selection features round Ø 30 cm, Ø 32 cm, Ø 35 cm, and Ø 42 cm pizza stones, as well as a rectangular 30 x 38 cm stone.

612093 **pizza stone,** 612092 **pizza stone rectangle**

Mustang cooling rack (611856)

Take the pizza out of the oven and place it on the cooling rack for a moment. This will cool down the crust, preventing the tomato sauce from making it soggy. Of course, the best way to prevent a soggy crust is to eat the pizza right away. The diameter of the Mustang cooling rack is 32 cm.

611856 **cooling rack 32 cm**

Mustang infrared temperature gun (611808)

One of the most important tools of a pizza-maker is an infrared temperature gun. The temperature of the pizza oven and the pizza stone in particular must be measured, which is impossible without such a device. Mustang's own infrared temperature gun displays temperatures up to 550 °C, making it one of the few devices capable of measuring the temperature inside a super-hot pizza oven. The temperature gun is also suitable for construction use, and you can use it for purposes such as measuring temperatures in the corners of your house if you suspect heat leaks.

623769 **infrared temperature gun**

Mustang pizza cutters (604021, 613115)

After baking, you need to cut your pizza into slices before putting it in your mouth. Mustang offers two pizza-cutters, of different styles. You can choose the style you prefer.

The rolling pizza-cutter has a Ø 9 cm blade. The knife-style pizza cutter features a wooden handle that gives you a firm grip. Wash only by hand.

613115 **pizza cutter,**
604021 **pizza cutter**

BRING IT WITH YOU GAS-OPERATED PORTABLE GRILLS

The following grills and gas stoves are ideal for motor homes, boats or being transported to the campsite in the back of your car:

602132 Mustang Gas grill Nomad

The Mustang Nomad is a portable gas grill with a bamboo cutting board that also serves as a serving tray. A Scandinavian modern look combined with a compact size. The grill has a 29 cm diameter chrome plated wire grill grate. It also comes with a non-stick coated aluminium grill of the same size, with one side smooth and the other side grooved.

273378 Mustang Gas grill Caravan

The Mustang Caravan is an oval-shaped portable gas grill. The grilling area is approx. 48 x 35 cm, consisting of a two-piece matte-finished cast-iron grill. The heat distribution plates are integrated into the grill grate. The grill is equipped with removable and foldable side tables, which allow the grill to fit into a small storage space.

286926 Mustang Caravan and Marine gas grill

Mustang camping grill works with a standard A4 disposable gas cartridge. Grilling area 33 x 25 cm. Comes with a plastic carrying case which makes it easy to storage in caravans or boats, and take in use when it`s time to eat.

615967 Mustang Gas stove

Mustang gas stove works with a standard A4 disposable gas cartridge. Comes with a plastic carrying case which makes it easy to storage in caravans or boats, and take in use when it`s time to eat

Mustang heat therapy

The flames of your fireplace enchant and warm you

What could be nicer than cozying up under a blanket in front of a warm open fire on cool fall nights or in sub-zero winter temperatures. The flames will enchant and warm you. While energy prices soar, using the fireplace to heat your home will also save money.

Mustang has a good selection of stoves, stove fans and fireplace accessories, both for storing firewood and stoking the fire.

All Mustang stoves meet the requirements of the German BImSchV 2 standard and are manufactured in accordance with standard EN 13240: 2001 + A2: 2007.

The stove fan is an effective way of spreading heat from the fireplace or stove and making indoor air more pleasant. The stove fan does not need electricity to work. It is activated by the heat from the stove or fireplace; the fan starts to spin when the temperature of its body reaches a temperature of 65 °C or more. The range also includes a fan attached to the steel pipe of the stove.

322966 Mustang Fireplace Virgo

The Mustang Virgo is a stylish and compact fireplace, suitable for both home and cottage. It has a black steel frame and a steel door with a large glass window. Granite deck and side panels. Heating power 7,5 kW. Efficiency 80 %.

262931 Mustang Fireplace Granite

Mustang Granite is a stylish fireplace for home or cottage use. The fireplace has a black steel frame and a steel door with a large glass window. Granite deck and side panels. Heating power 7,2 kW. Efficiency 78 %.

262932 Mustang Fireplace Basement

Mustang Basement is a steel fireplace for the cottage. It has a black steel frame and a glass hatch. Heating power 5,0 kW. Efficiency 78,9 %.

Spreads the warmth of the fireplace effectively!

298072 Mustang Stove fan 4-blade

A powerful 4-blade stove fan that efficiently distributes heat throughout the room. Operating temperature 75-345 C, but works most efficiently at 200 C.

610383 Mustang Stove Fan for flue pipe

A stove fan that is magnetically attached to the steel flue pipe of a fireplace or light fireplace. Suitable for 115-200 mm pipes. Operating temperature 65-345 C. Recommended operating temperature approx. 105-250 C.

Other fireplace equipment

Fireguards prevent sparks from flying from open fireplaces to the surroundings. The Mustang range includes the 300351 Mustang Fireguard 46x65 cm and the 313248 Mustang Fireguard.

The range offers a wide selection of different options for handling firewood. 313253 Mustang Log holder with fireplace tools, 284083 Mustang Firewood holder rectangle, 610382 Mustang Firewood holder Tower, 610232 Mustang Firewood holder with wheels, 321277 Mustang Firewood holder bucket Wood as well as 323263 Mustang Collapsible Firewood carrier.

The range also includes a wide selection of fireplace tools. 182802 Mustang Fireplace tools 4 pcs, stainless steel, 309200 Mustang Fireplace tool set Bridge 4 pcs, 211321 Mustang Poker, 330466 Mustang Shovel 100 cm.

A thermometer attached to the steel part of the stove with a magnet to monitor the external temperature of the stove for the use of the stove fan, for example. Measuring range 0–500 °C. 330471 Mustang Stove thermometer.

More than a grill

The addictive and versatile Kamado will captivate you

In barbequing, you grill the meat in low heat for a long time, making it extra tender and providing it a nuanced flavor. Barbequing often utilizes smoke circling around the meat, cooking the meat in the process. It is as if smoking and grilling were to work together. Master the new way to grill.

Kamado grills have played a major part in the barbequing breakthrough. Their unique ability to store heat makes cooking large pieces of meat in low heat for longer periods of time easier. Mustang Kamado grills have been developed from the point of view of the users and they challenge larger international brands with their quality and features.

Grilling causes an unstoppable urge to experiment only measured by the end results. We want our customers to get the most out of their grills. Kamado is a versatile grill, because it can also be used for smoking and as an oven, in addition to grilling. The Kamado grill accessories provide even more options for grilling enthusiasts. You can cook tender brisket, ribs, wings, burgers as well oven porridge cooked over night in the Kamado.

MUSTANG KAMADO INCLUDES

- stainless steel grill grate
- ceramic heat distribution plate
- ash rake

ACCESSORIES

- grid expander
- 5 in 1 grilling system
- rotissery kit
- ignition fan
- cover

New ways to light charcoal

Light charcoal quickly and easily

Mustang Eco lighting cubes 211319
Plant oil based fire lighting aid, non-toxic and odorless. Made from pine-based biomass.

MUSTANG`S ENTIRE PRODUCT RANGE BEGINNING ON PAGE 38 AND AT mustang-grill.com

Many people find it difficult and time consuming to light a charcoal grill, which is why they favor gas grills. This is only due to people not being familiar with new equipment designed to make lighting your grill easier.

218140 Mustang Chimney starter

With the Mustang chimney starter, you can light your charcoal grill quickly and easily. You will get your charcoal grill up and running in less than 10 minutes with this tool.

- Put a few Mustang firelighters, a firelighter sachet or a couple of scrunched up newspaper spreads on the charcoal grill. Place the chimney starter on top of them. Fill the chimney starter with charcoal. Then light the firelighters, firelighter sachets or newspaper.
- The flame will rise inside the chimney starter and ignite the charcoal at several points at the same time. The flame and heat will spread efficiently from one coal to another.
- When the charcoal glows red, pour it from the chimney starter to the charcoal grill. Place the hot chimney starter on a heat-resistant surface to cool down. Put the grilling grid into place and start grilling. All this in less than 10 minutes, which is the same time as it takes to pre-heat a gas grill.

611810 Mustang Grill lighter

In the 2023 season, Mustang will introduce a new electric grill lighter. You can use it to light charcoal easily.

- The tip of the grill starter is taken close to the charcoal and the operating switch is pressed to the bottom. The burning hot tip of the lighter makes the charcoal glow in roughly 30 seconds.
- Then, the lighter is taken off the charcoal and hot air is blown for about 30 seconds. This ignites the charcoal quickly and easily without the use of any lighter fluids.

610669 Mustang Kamado ignition fan

The Mustang Kamado ignition fan is intended to speed up the lighting of the Kamado grill.

- The ignition fan is installed in the bottom vent of the Kamado grill.
- The charcoal is ignited using Mustang Eco firelighters or the Mustang Grill lighter.
- After that, the ignition fan is turned on. It blows air to the glowing embers and ignites them quickly and efficiently.
- Once the embers have been ignited evenly, the ignition fan is turned off and removed from the bottom vent.
- Then, the desired temperature of the Kamado grill is adjusted with the top and bottom vents.

The Mustang ignition fan is suitable for Mustang Kamado L, XL and XXL grills or other Kamado grills of the same size.

CLASSIC

Easy lighting with the popular Mustang chimney starter!

NEW

Grilling in wintertime

Enjoy grilling all year

MUSTANG`S ENTIRE PRODUCT RANGE BEGINNING ON PAGE 38 AND AT mustang-grill.com

Grilling is a year-round activity. Gas, charcoal and Kamado grills are well suited for year-round use. When grilling in the wintertime, you should take the following into account:

Initial cleaning

• Carefully clean the grill of any snow before use. A cover over the grill makes cleaning easier.

• Carefully remove the cover from the grill. Although Mustang covers can withstand -20 °C temperatures, they are rigid when cold and may tear if handled roughly.

• Also remember to clean the grill's surroundings of any snow to make grilling more comfortable.

Lighting

• When using Kamado grills, carefully open the lid so that any seals frozen together do not tear.

Tip! Put a thin piece of wood between the lid and bottom of the Kamado grill. This way, the seals will not be able to freeze together.

• When using Kamado grills, first, place a few pieces of charcoal in the grill and light them. A small flame will remove any moisture from the grill's structures before the actual grilling with more charcoal.

• For gas grills, take the longer pre-heating time into account. The grill is ready for use when the grill thermometer displays more than 200 °C, preferably closer to 250 °C.

Grilling

• Bring the meat and vegetables you want to grill out to the grill only when the grill is ready for use.

• Always grill with the grill lid closed. This will keep the heat inside the grill better.

• On dark winter nights, you will be able to see the process in the grill better when you attach a Mustang grill light with 10 LED lights to the grill lid handle.

• After use, protect the grill with a cover to make it easier to use next time. Please note! Always wait for the grill to cool before covering.

Lighting products page 138

Grill maintenance

Careful maintenance will extend the life of your grill

See the grill maintenance video:

MUSTANG`S ENTIRE PRODUCT RANGE BEGINNING ON PAGE 38 AND AT mustang-grill.com

To ensure your gas grill lasts as long as possible, it must be cleaned and maintained regularly. It is especially important to carry out comprehensive maintenance on your grill if you are going to store it for a long period of time.

Grill grates and griddles

• Turn on the grill and heat it up to more than 250 °C. This will burn any fat, marinade and food residue left on the grid into carbon.

• Let the grill cool down to lukewarm.

• Spray the grill grid and plates with the new Mustang grill grid cleaner, which is also suitable for the cleaning of cast iron components. Let it sit and clean the grill grates and the griddles with a grill cleaning brush.

• Then, wipe the grill grates and griddles clean of any loose dirt with a cloth.

• If necessary, you can wash the grill grates and griddles in the sink, as well.

Please note! If you have cast iron grids and griddles, only use hot water and a cleaning brush to wash them. Cast iron parts must not be washed with detergent.

• Dry the grid and griddles after washing.

Flame tamers

• Spray the flame tamers with Mustang grill grid cleaning fluid or grill cleaning fluid and allow it to work.

• Clean the flame tamers with a BBQ cleaning brush and finish the cleaning with a Mustang microfiber cloth.

• You can also wash the flame tamers in the sink.

• Dry the flame tamers after cleaning.

Inner and outer surfaces of the grill and the grease tray

• Spray Mustang grill grid cleaning fluid or grill cleaning liquid and allow it to work. Use the Mustang cleaning pad to rub clean. Finish cleaning with the Mustang microfiber cloth.

Please note! Use the smooth surface of the cleaning pad to clean the outside surfaces of the grill. You can also use Mustang wet tissues to clean the outside surfaces. If necessary, rinse the cleaned surfaces with water.

Finishing and grill cover

• After cleaning the grill, place the flame tamers, grids and griddles back in the grill.

• Turn on the grill and heat it up to remove moisture from the grill parts.

• Let the grill cool down.

• Once cooled, protect the grill with a grill cover.

Please note! Do not tighten the cover on too tightly. Air must be able to circulate under the cover. We recommend storing the flame tamers, grids and griddles in a dry, warm place, although otherwise the grill can be stored outside when covered.

NEW

Mustang Grill grid cleaning fluid

Mustang Grill grid cleaning fluid is a unique biodegradable grill grate and plate cleaning agent. It is also suitable for cast iron grates and plates, which may not be washed with any other cleaning agents. The cleaning fluid itself is biodegradable. If it ends up on the ground for some reason, it will evaporate within a few days without harming the sensitive environment.

This unique detergent is also suitable for cleaning the other inner surfaces of grills and grilling accessories. It is also suitable for stainless steel, for which a dedicated cleaning agent has been required in the past. Thanks to its gel-like consistency, it will stay on the vertical surfaces of the grill long enough to work. This detergent removes any grease and burnt food efficiently. The bottle is made from recycled plastic. The cleaning fluid and the bottle are made in Finland, and the product has been awarded the Key Flag Symbol. The size of the bottle is 750 ml.
