

Maku
KITCHEN LIFE

Autumn/Winter 2024

The new Maku products now feature a plenty of items made from recycled materials!

This autumn, we are proud to introduce a wide range of products, with an impressive 73-100% of their raw materials being recycled, post-consumer materials.

Even the small choices we make together matter. For our part, we strive to support environmentally friendly choices in Maku selection by, for example, increasingly favoring products that contain recycled raw materials.

Patron frying pans

The high-quality Patron pans feature a durable ceramic coating that ensures easy frying, and their compatibility with all types of stoves makes them versatile partners in cooking.

Patron Fry pan 24 cm

638961

Size: 25x43x5 cm

Material: aluminum, stainless steel, wood flour

45,95 €

Patron Fry pan 28 cm

638972

Size: 29x46.5x8 cm

Material: aluminum, stainless steel, wood flour

51,95 €

The metal raw material of Patron frying pans is

100 %
recycled aluminum.

Recycling post-consumer aluminum consumes about 95% less energy compared to producing new aluminum from ore.

The pans are completely PFAS, PTFE, and PFOA free.

The handle of Patron pans is made from PEFC-certified wood flour, sourced from sustainably managed forests.

Ease series

The high-quality Patron pans feature a durable ceramic coating that ensures easy frying, and their compatibility with all types of stoves makes them versatile partners in cooking.

Ease fry pan 24 cm

635215
Size: 44x25x6 cm

21,95 €

Ease fry pan 28 cm

641594
Size: 48x29.2x6 cm
Material: stainless steel, bakelite
32,95 €

90 %
of the steel in the
popular Ease series is
now recycled.

Metals can be recycled almost indefinitely without degrading their properties.

In addition to conserving natural resources, recycling post-consumer steel consumes about 60-74% less energy compared to producing new steel from ore.

Ease series

All Ease series products feature an efficient 5 mm layered base that ensures even heat distribution and excellent frying results. Ease series pots and pans are suitable for all types of stoves and are dishwasher safe. The lids are made of tempered glass with a steam vent and a tight silicone rim.

The saucepan has a spout that makes pouring easier.

The glass lid of the Maku Ease steel pot has an integrated silicone strainer, making it easier to pour out cooking water, and a spout for even easier pouring.

The notches in the silicone rim of the lid provide a convenient place for a spoon.

rPET products

The Maku range now includes several products made from rPET plastic. rPET plastic is made from recycled PET products, such as beverage bottles. Its use reduces the need for virgin oil, which is the main raw material for plastic.

Recycling plastic can also save energy, as reprocessing plastic generally requires less energy than producing new plastic. rPET plastic is durable, lightweight, and easily recyclable.

KITCHEN UTENSILS

The heat resistance of handy rPET kitchen utensils is max. 230 degrees, and they are dishwasher safe.

73 %
of the material used to make
rPET kitchen utensils is recycled PET plastic.
