DEAR READER

For Mustang, spring 2025 will be a veritable feast of innovations. We will launch more than 40 new grills and grilling tools or other grilling accessories. Some of the new products are presented in the articles of this magazine, but all of them can be found in the catalogue.

The real novelty for spring is the Charleston gas grill collection, which takes grilling to a whole new level. From now on, you can precisely control the temperature of the gas grill with a thermostat, and monitor the temperature rise inside the grill with a LED display on the side plate. The high-quality materials used in the grills and this technical feature make the Charleston range of grills a real challenger to the world's biggest brands.

The Astroni 14 pizza oven makes cooking pizza really easy. With the oven's preset programmes, you can bake different styles of pizzas effortlessly. The oven adjusts the temperature to the optimum level for each type of pizza, directs the right amount of heat under the pizza stone and to the top of the oven, and bakes the pizza for just the right amount of time. Could pizza baking get any easier?

The plancha grilling, popular worldwide, will be coming to our market when Mustang Plate 3 hits the shops. The flat griddle, the plancha, is suitable for all kinds of grilling. A fun detail is the colour-changing LED lights on the grill's control knobs.

A lot of time has been spent polishing up the technical innovations, as well as finding new grilling tools for consumers. Alongside our own range, we have made a few exclusive models for different customers. We will open this exclusive model process in a separate article.

To make it easier for consumers to choose a gas grill, we have written tips on how to choose the right gas grill. In addition, we will tell you about the new acacia-marabou hardwood charcoal, which is particularly suitable for kamado grilling.

Happy and tasty grilling spring and summer 2025!

Sami Sinisalo
Brand Manager

Choose the right grill to suit your needs

For many consumers, buying a new gas grill can be a challenge not knowing what type of grill would be best for you. We've put together some guidelines to help you make the decision.

1. Density of use. For what purpose is the grill being purchased?

- The grill is used a couple of times a week throughout the grilling season, from spring to autumn.

Choose a grill with quality materials to make it last for several years of use. Cast aluminium, enamelled steel and stainless steel are long-lasting materials that can withstand well with heavy use of the grill. Powder-coated grill parts are durable and long-lasting for a few years, but with good care they can last longer.

- The grill is used a few times during the summer.

The materials of the grill are not so important. Powder coated steel as a material will last for several years when the grill is rarely used.

2. How many people do you usually need to cook for?

- 1-3 person: 2 burners or 3 burners
- 3-4 person: 3 burners or 4 burners
- 4-6 person: 4 burners, 5 burners or 6 burners

3. Palm size

One palm is almost the size of a steak, chop or chicken fillet. Placing the palm next to each other on the grill grate shows how many steaks, chops or chicken fillets can be grilled at once.

This tells you how many people you can cook a hot meal for at once. In other words, how many people the barbecue is generally suitable for.

4. Budget

- 200-300 € will get you a good grill for everyday use, which will last for several years in terms of materials.
- 300-500 € will get you a very good grill, made for made of high quality materials that will last a very long time.
- 500-800 € will get you a grill that is made of very high quality materials and will last for a very long time. Time has been spent in the design and technical features of the grill. The grill will last a really long time under heavy use.
- 800-1300 € for a big grill made of really high quality materials. Time has been spent in the design and technical features of the grill. The grill will last a long time under really heavy use.
- Over €1500 you can get a complete outdoor kitchen for your backyard, a grill with water points and outdoor refrigerators are combined. The grills are generally made entirely of stainless steel. The grill will last a really long time in use.

When considering your grill budget, it's worth taking into account, that in addition to the grill, you also need to buy:

- ✓ A pressure regulator and a gas hose
- ✓ A grill cover to fit the dimensions of the grill
- ✓ Grill cleaning brush, cleaning cloths and other cleaning equipment
- ✓ Other grilling equipment and accessories
- ✓ Possible gas cylinder

5. Equipping the grill. What do you grill on your grill?

- For steaks, fillets, sausages and skewers the grilling area can be entirely griddled.
- If you are also grilling smaller dishes or smash burgers, part of the grilling area can be grilling plate.
- Multigrill grid is suitable for the versatile cook. Get various Multigrill accessories such as a paella pan, pizza stone or wok pan.

CHOOSING A GAS GRILL

What should you consider when choosing a suitable gas grill?

What is it about?
Adjust gas grill temperature precisely with thermostat!

MUSTANG CHARLESTON – THE FUTURE OF GRILLING

The Mustang Charleston, the real super-novelty of the 2025 grilling season will redefine gas grills for a new era.

Top quality materials

The materials used in Charleston grills are the best available. The grill's fireboxes and lid tops are made of cast aluminium. This stainless material ensures a super long service life for these parts. The other parts of the grill lid are made of enamelled steel, or stainless steel for the Charleston S model.

The grill burners are made of the best 304 stainless steel available. Between the burners are 304 stainless steel reflector plates that reflect the heat from the burner down to the grilling area. The heat distribution plates are made of either enamelled steel or 304 stainless steel, depending on the model.

Technology of the future for indirect and direct grilling

In addition to the super-quality materials, Charleston grills are equipped with technology that takes grills into the future. Gas grills and grilling are entering a new era with the introduction of thermostatically controlled grill temperatures. This allows the internal temperature of the grill to be very precisely set at the desired temperature.

Charleston grills have a thermostatically controlled temperature for indirect grilling. The grill can be set to 140°C, 160°C, 180°C, 200°C or 230°C. The temperature setting is shown on the LED display. If the thermostat control knob is turned to the BBQ setting, the LED display shows the actual temperature of the grill.

Although the system is primarily intended for indirect grilling, i.e. cooking food at low temperatures for long periods of time, the temperature settings include temperatures suitable for normal grilling. In this case, of course, it must be taken into account that not all burners are on when the temperature is adjusted by the thermostat.

Versatility and power for grilling

The side burners are equipped with an infrared. The powerful infrared burner allows the steaks to be sealed directly on the burner and then transferred to the inside of the grill to finish cooking. Cooking and frying in a pan is perfectly possible on the infrared burner. The heat is not affected by the wind.

Charleston grills have porcelain enamelled cast iron grilling grates. This smooth enamel finish reduces food sticking, making it easier to clean the grates. The Multigrill grid allows the use of a cast iron sealed grill or Mustang's wide range of accessories.

The Charleston grills have separate recesses in the cabinets for gas cylinders. This allows the gas cylinder to be stored in the grill cabinet even when the grill is in use. The grills have been type-approved with this in mind.

Mustang's wide range of accessories includes various pans that can be used for indirect grilling. Due to the quality of the materials used, Charleston grills are covered by Mustang's 10-year warranty programme.

SUCCEED WITH PLANCHA

Plancha is an easy way to fry fillets, seafood, smash burgers, and even pancakes.

Plancha – what is it about?

Throughout the ages, many consumers have preferred the entire grilling area of a conventional gas grill to be an enclosed area. However, this is not possible with a standard gas grill because the surface temperatures of the grill's firebox and body would rise above the standard limits if the grilling area were completely sealed. The heat cannot escape from the inside of the grill. The solution to this problem is the new Mustang Plate 3.

Sealed, even grilling area

With the Mustang Plate 3 gas grill, the entire grilling area is a uniform, even cooking surface, the plancha. Plancha is a Spanish term meaning a closed cooking area. The body of the grill has separate openings that allow heat to escape from under the plancha. The Mustang Plate 3's sealed plancha, with low side walls, allows small food items to turn on the grill without dripping off the outside.

The Plate 3 plancha is made of enamelled steel. Thanks to the enamelling, food hardly sticks to the plancha and it is very easy to clean it after use. With the plancha, you can cook regular steaks and chicken fillets just like on a regular grill. But it's also ideal for cooking, for example, stir-fries, pancakes, prawns and other seafood. It's made for smashing burgers.

Even temperature throughout the grilling area

The Mustang Plate 3 grill has three burners that ensure a truly even temperature across the entire plancha area. It doesn't matter if the food is in the front or the back of the grill. The temperature is the same everywhere. Plate 3 allows you to close the grill lid when in use. This ensures an even more even heat distribution in the grilling area. Of course, the heat is sufficient even when grilling with the lid open. The burners have battery-operated ignition.

The control knobs have colour-changing LED lights. When the led lights are turned on, the control knobs glow blue. When a burner is turned on, the LED light on the control knob changes to red. This makes it easy to see which bulbs have been turned on.

Easy cleaning

After use, the grill is easy to clean by scraping any grease left on the plancha through the opening in the front of the grill into a pull-out grease cup. The plancha itself is lifted out of its place and washed clean in the sink.

Under the Plate 3 grill, one of the new additions for the 2025 season is the Mustang utility table storage cabinet. It serves as an excellent work surface under the Plate 3 grill, or as a serving tray for food. It's also a great platform for baking pizza. Its 304 stainless steel platform is food grade approved.

See the recipes for plancha on the next page!

Even temperature – use the entire grilling area!

GRILL WITH PLANCHA

Plancha with side walls makes it easy to prepare small dishes without them falling off the grill. The enamelled sealed plate is also easy to clean.

Double smash burgers

for four

- 560 g minced meat (20% fat)
- 4 pcs brioche burger buns
- 4-8 slices of cheddar cheese
- 1 onion
- approx. 2 dl whole mayonnaise
- salt and pepper
- oil and a knob of butter for frying

Make 8 pcs 70g balls of minced meat. Cut the onion into thin rings. Season your mayonnaise if necessary, but you can also use it as it is.

Heat the plancha over medium heat for about 3-4 minutes. Sauté the onions in the oil and butter mixture for a minute and set aside. Place the mince balls on the oiled plancha and let them fry for a minute. Take a piece of baking paper and place it between the mince balls and the steak press. Press the balls into thin steaks on the steak press so that they flatten properly. Turn and season with salt and pepper. Heat the buns and assemble the burgers with mayonnaise and fried onions.

English breakfast

- toast
- bacon
- white beans in tomato sauce
- steak tomatoes
- sausages and bratwursts
- eggs
- orange marmalade

Bake and heat the ingredients on the plancha. Season the tomatoes with black pepper and sprinkle with fresh basil. Plancha grilling tool set's egg molds are a handy aid for frying eggs and piercing toasts.

Serve in the traditional way with English tea and orange marmalade.

Easy to storage even in small spaces.

FOLDING GAS GRILLS

Is the storage space of a gas grill causing problems? The solution is Mustang Fold and Amarillo.

You need a gas grill, but there is no room to store it. Then the new Mustang Fold or Amarillo gas grills are the solution. Their folding trolley or folding legs and side tables allow them to be stored in a small space.

The folding Fold

The Mustang Fold is a gas grill made of really high quality materials, with the possibility of folding the trolley. The folded grill can be easily moved from storage to the terrace for use and back to storage after use. The folded grill can also be stored vertically. The grill trolley has a support for this vertical storage. Clean the grill well and empty the grease tray before storing it upright to avoid spilling grease on the floor of the storage area.

The Mustang Fold grill lid and firebox are made of enamelled steel, giving them a really long service life. The grilling area is divided in half between a matte enameled cast iron grid and a grill plate. The heat distribution plate is built into the grilling grate. The cast iron grid is double-sided, with one side grooved and the other side with a smooth flat surface. The rectangular stainless steel burner provides even heat to the grilling area.

Take the Amarillo with you

The Mustang Amarillo is particularly suitable for caravans, trailers or boating. The legs of the grill can be folded under the grill if required. The side tables can be folded under the grill lid after use. The grill lid is lockable. This makes it possible to store the grill in a small space and to carry it easily by holding the handle of the lid.

The grilling area of the Amarillo is divided in half between a matt-finished cast-iron grid and a grilling plate. The grill lid, firebox, side plates and legs are made of powder-coated steel.

Electric pizza oven with several different baking programs

THE NEW ERA OF PIZZA OVENS

Easy pizza baking with Mustang Astroni 14 pizza and multifunction oven

**FAST AND EFFICIENT
- READY-TO-USE BAKING
PROGRAMS**

Versatile oven for different pizza styles

Pizza cooking has become part of the big picture of grilling. Recently, electric pizza ovens in particular have been gaining popularity. This popularity is due in particular to their ease of use. The Mustang Astroni 14 pizza and multifunction oven is tailor-made to meet this demand. The Astroni 14 pizza oven is an electric pizza oven with five factory settings for different styles of pizza and three settings for use as a conventional oven.

The pre-selected factory settings take into account the best baking temperature for the different types of pizza, how the heat is distributed from the top of the oven or under the pizza stone and the optimal baking time. It is possible to fine-tune these factory settings. Or, if you feel like a pizza professional, you can use and adjust the oven settings completely manually. And when you get lazy, what could be easier than putting a frozen pizza in the oven. The Astroni 14 has a dedicated programme for frozen pizzas.

Astroni 14 is the perfect oven for small kitchens, such as summer cottages. In addition to cooking pizzas, it works as a conventional oven. You can use it to prepare different types of oven dishes or use it for baking. By removing the pizza stone and replacing it with a cast iron pan, you can cook steaks inside the oven.

The Astroni 14 pizza stone measures 33 x 33 cm. The body of the oven is partly made of cast aluminium. The oven door is triple-layered. Oven is type-approved for indoor use.

Especially for kamado grilling!

HARDWOOD CHARCOAL

Very long burning time and smooth flavour with a blend of marabu and acacia.

Hardwood charcoals from different species of wood are particularly popular with kamado grillers. Hardwood charcoal offers very long burning times, which are particularly suitable for kamado grilling. Hardwood charcoal can also be used in other charcoal grills.

Mustang will bring its own hardwood charcoals for the 2025 season, a mixture of acacia and marabou. This blend brings the best of both hardwood species into one bag. Marabu has a very long burning time and acacia has a smooth taste. Add to this package a small amount of residual ash and you have a near perfect combination.

The size of Mustang hardwood charcoal is, as usual, larger than normal barbecue charcoal. The coals are packed in 10 kg bags.

Would you like to have a high quality Mustang grill available just for your range?

Models customized for our customers for example: Charleston 5+1, Alabama 3 and black Hornet electric grill.

EXCLUSIVE MODELS

In addition to the very wide range of general Mustang grills we have the possibility to customize grill models for exclusive sale.

How does the process work?

Choosing and designing the model

Together, we choose a grill model from the Mustang range and customise it according to your wishes. Alternatively, we can choose a grill from outside the range or design it from scratch.

Order quantity

The number of orders for exclusive sales models always varies on a case-by-case basis. The amount is influenced by the amount of customization that is done on the product. The minimum quantity is 1-2 pieces per 40 HC containers, i.e. around 300-500 pieces. In some cases the quantity can be considerably higher.

Brand and product name

The brand name for exclusive grills is always Mustang. We can do the naming of the grill together, or on your behalf.

Things to modify on the grill

- Materials for the grill cover, control panel, trolley cabinet, trolley cabinet doors and front edges of the side panels
 - Powder coated steel can be replaced with stainless steel.
 - Stainless steel may be replaced with powder coated steel.
 - The colour of the powder coating and the surface of the coating can be changed, the colour charts of the different factories are available for selection.

Replacement of grill trolley parts

- The cabinet trolley can be replaced with a front panel.
- The front panel of the trolley, can be exchanged for a cabinet.

Grilling grid and plate

- Inside the grill, the grilling surface can be selected as a fully cast iron grid.
- The cast iron grid can be replaced by a stainless steel grid.
- If the grilling surface was originally all grilling grate, some part may be replaced by a cast iron plate.

Material of burners

- Cast iron
- Stainless steel

Material of flame tamers

- Galvanised steel
- Enamelled steel
- Stainless steel

Contact us and let's plan your Mustang exclusive sales model!

GEORGIA

- off-set smoker
- large smoking area, can be used in direct grilling
- smoke circulates two times in the smoking chamber
- grilling grids for direct grilling in fire chamber

Mustang

OFF-SET SMOKER GEORGIA L

Extreme robust off-set smoker. Fire is made in separate fire chamber, from where smoke is led to grilling/smoking chamber. Robust grilling grids are made from 6 mm thick enamelled wire steel. Grilling/smoking area 72 x 37 cm. Warming rack 65,5 x 14 cm made from enamelled wire steel. There are grilling grids 39 x 37 cm in fire chamber for direct grilling over coals. Fire chamber has flat lid, which can be used for preparing food or to keep them warm.

Fire and grilling/smoking chamber are made of 3 mm thick rolled steel. Powder coating has heat resistance up to 600 degrees. Air is led to coals through big air valve in fire chamber. Smoke is led out of grilling/smoking chamber through chimney. In top of chimney has valve, which regulates draft. Chimney output is positioned in a way, that smoke has to do double circulation inside grilling/smoking chamber. Charcoal grid in grilling chamber for direct grilling.

Robust and big wheels ease handling. Lid has two thermometers, which help to check temperature inside grilling/smoking chamber. Through two separate hatch meat thermometer probes can be placed into grilling/smoking chambers. Possibility to use Mustang rotisserie 312849. Weight 80 kg. Packed into 3 cartons. Suitable cover 602303. Warranty 2 years.

MAKE YOUR GRILL LAST LONGER

NEW

Mustang
DRIP PAN LINER 60X29,5 CM 4 KPL

Drip pan liner protects the grill's own grease tray from fats, marinades and muscle fluids dripping from the food. Eases the cleaning of the grease trap. A small amount of water in the pan makes it easier to empty and reduces fat sticking to the pan. Fits most gas grills. The package contains 4 drip pans. Made of aluminum foil. Size 60 x 29,5 x 2,5 cm.
