Cookware with new top coating!

Andre Geim and
Kostya Novoselov
discovered graphene
in 2004, and won the
2010 Nobel Prize for
Physics.

GRAPHENE – a revolutionary new coating material.

Extraordinarily strong

Harder than diamond.
200 times stronger than steel.

Excellent thermal conductor → energy efficient

10 times faster than copper.
60 times faster than steel.

Incredibly thin and light

One atom thick, 100,000 times thinner than a human hair.
