DEAR READER,

Spring 2022 is right around the corner, and we are definitely looking forward to it. We have plenty of new products to meet consumers' extensive demands.

The new Mustang Connoisseur collection brings a brand-new burner solution to the market. The burner structure has been modified so that it lets the flame burn across the whole burner. This makes the front section of the grilling area, which is conventionally less hot, hotter than usual, allowing you to grill food in the front section, as well. The infrared side cooker of the Connoisseur grills can also be used for grilling. The burner of the side cooker reaches a temperature of approximately 800 °C. When meat is cooked at such temperatures, the surface is quickly seared, keeping the meat moist and juicy.

Homemade pizza continues to be immensely popular. Mustang answers this demand by introducing two new pizza ovens, Vomero 16 and Dome. Also, the earlier models Vesuvio 12 and Napoli have undergone some technical improvements. Regarding pizza supplies, we are proud to say that we have the most extensive selection in this category too. We offer all the supplies you could want for making pizza.

With this magazine, we are introducing a new term: "fire therapy." This means relaxing by an open fire, and Mustang's broad selection of fire pits provides great opportunities for it.

When browsing the stores, you may want to pick up Mustang's new consumer brochures. In them, you can find excellent tips and recipes for grilling, creating pizzas, or even making smoked dishes.

We wish you a pleasant and delicious barbecue spring and summer 2022.

Sami Sinisalo

Product manager, Tammer Brands Oy

page 6

Connoisseur

The versatile Connoisseur gas grill is a truly gourmet choice

The grills in the Mustang Connoisseur range are jam-packed with new technical features. Their infrared side cooker also serves as a grill. The cooker reaches a temperature of approximately 800 °C in a matter of seconds. When meat is cooked at such a temperature, the surface is quickly seared, keeping the meat moist and juicy. The so-called Maillard reaction, in which the proteins and sugars of the meat react to one another to create a beautiful dark-brown surface and an aromatic smell, happens very quickly. Seal the surfaces of the meat with it and then move the meat to the actual grill side to cook to the desired inner temperature. When the side cooker is used for boiling, its infrared radiation is unaffected by the wind, preventing it from reducing heat under the pot or pan.

The structure of the main burners of the grill has been overhauled completely. A so-called Venturi pipe, in which liquid gas and air are combined into a suitably combustible mixture, has been attached to the center of the burner, enabling the flame to cover the whole burner. This makes the conventionally less hot front section of the grilling area hotter than usual, allowing you to grill food in the front section too.

The right-hand side of the grilling area features a power burner that has more heating power than the other burners, making it possible to sear meat surfaces quickly or grill foods at higher temperatures.

There is a separate round grate in the middle of the grilling grates that can be replaced with any of various products in the Mustang Multigrill product selection. Use a cast iron grilling plate or a wok pan, or choose another accessory from the extensive Multigrill selection.

The structures of the grill, especially the structure of the lower cabinet, make it possible to keep the gas bottle in the cabinet while the grill is on.

Compatible with Multigrill accessories

Multigrill accessories: 603435 cast iron pan, 325036 cast iron grilling plate, 603438 cast iron wok pan, 327531 cast iron pans (2 pc. set), 324710 chicken roaster, 298067 paella pan

We present a top-quality, highly versatile gas grill with powerful infrared side burner and power burner for closing meat surfaces or otherwise high-power grilling. Thanks to the new design of the burners, the flame also burns at the front of the burners. In this way, it is possible to utilize the entire grilling area for efficient grilling.

MGS

stands for Multigrill System

Many of our gas and charcoal grills feature grilling grates with a separate round Ø 30 cm grate in the middle. This grate can be replaced with accessories selected from Mustang's extensive Multigrill System selection.

Whether you're planning to make a pizza on the grill or quickly wok up some vegetables, the MGS is the solution. If you want to replace the grate with a grilling plate, the MGS selection has you covered. Or if you want to make some pancakes in a frying pan, the MGS selection features a pan for the purpose.

The MGS selection also features a paella pan, a chicken-cooking rack, and rectangular cast iron baking dishes. These accessories are not used to replace the round grate but placed directly on top of it.

Mustang Sapphire grills have their own selection of accessories, with all these products being compatible also with other Mustang grills.

MAKE YOUR GRILL THE SUMMER KITCHEN OF YOUR DREAMS WITH MULTIGRILL ACCESSORIES

Multigrill accessories: 325435 Sapphire Multigrill cast iron pot (7 L), 316743 cast iron pan, 603434 cast iron grilling plate, 603438 cast iron wok pan, 316871 pizza stone, 327531 cast iron pans (2 pc. set)

Smash burgers

With the Mustang grill and accessories,
you make mouth-watering burgers in no time

Smash burgers have become hugely popular, and for good reason: they are so delicious! Use the Mustang grill and accessories to make mouth-watering burgers in no time.

Calories are not counted now

SMASH BURGERS

*approx. 600 g ground beef /
150 g per patty (fat content approx. 20%)*

1 large red onion cut into thin rings

4 slices of Monterrey Jack and cheddar cheese

2 dl chili mayonnaise

4 burger buns (e.g., brioche or potato bun)

A smash burger is based on a burger patty that is flattened onto the surface of a hot grilling plate. When the thin patty cooks in its own fat, a wonderfully crispy and tasty lacy edge is formed around it. To flatten the patty, you need a grill press, which can be found in Mustang's broad product selection.

Add your toppings and cheese slices on top of the patty and cover the whole thing with a grilling dome. The cheese will melt and the patty will be cooked to completion quickly under the dome. Then, all you have to do is assemble the hamburger.
(Recipe for four)

You need these to succeed:

Mustang accessories: 324177 grill press, 604031 grill dome,
316435 grill spatula SST, 325036 cast iron grilling plate

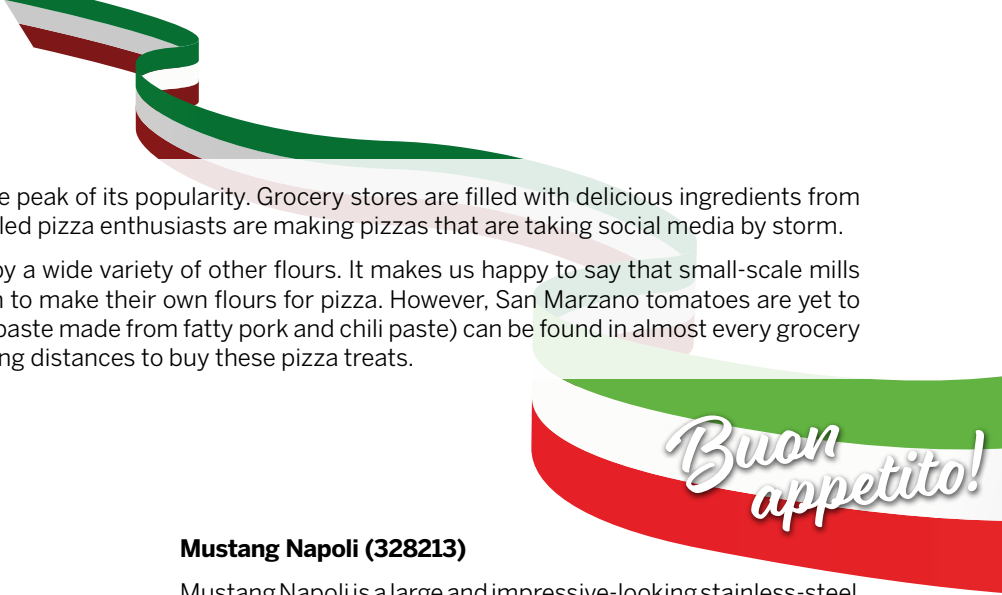

MUSTANG » smash hit

Set up your own pizzeria at home

The most delicious pizza is now made at home

Buon appetito!

Homemade pizza is currently at the peak of its popularity. Grocery stores are filled with delicious ingredients from around the world, from which skilled pizza enthusiasts are making pizzas that are taking social media by storm.

Caputo flours are accompanied by a wide variety of other flours. It makes us happy to say that small-scale mills have seized this opportunity and begun to make their own flours for pizza. However, San Marzano tomatoes are yet to have a challenger. 'Nduja (a salami-like paste made from fatty pork and chili paste) can be found in almost every grocery store. People no longer have to travel long distances to buy these pizza treats.

Mustang Napoli (328213)

Mustang Napoli is a large and impressive-looking stainless-steel wood-burning pizza oven. It is a veritable king of the garden and every pizza enthusiast's secret daydream.

After the winter, Napoli returns to the market with a new design. The bottom part of the oven has been completely redesigned. Thanks to the new structure, the floor of the oven now consists of one level area. This makes it possible to bake pizzas directly on the oven floor. The door and the chimney of the oven have also received technical improvements.

The shelf and the bottom level of the Napoli trolley are excellently suited to storing firewood, eliminating the need for a separate rack for wood. The large side shelves of the trolley can be used for handling a pizza next to the oven.

Mustang Vesuvio 12 (608192)

Mustang Vesuvio 12 is a gas-operated pizza oven that satisfies your cravings quickly. Its 2 cm thick pizza stone stores heat and bakes perfectly crispy pizzas. Thanks to its thickness, the stone stays hot for a long time. This lets you you can bake one pizza after another in the Vesuvio oven without having to worry about reheating the stone.

The U-shaped burner bakes the pizza from three sides simultaneously. Rotate the pizza a couple of times in the oven to make sure the crust is baked evenly. The burner is guaranteed to be powerful enough to work in winter conditions. The oven's maximum temperature is 500 °C, but you can bake your pizza at lower temperatures. Don't dawdle – your pizza will be ready in about 90 seconds!

Mustang Vomero 16 (610626)

A gas-operated tabletop pizza oven with a flame resembling that of a wood-burning pizza oven. Impossible? Not with Mustang Vomero 16. The oven has a very powerful burner on the right side, creating a sea of flames in the ceiling that cooks your pizza toppings in an instant. Normally, flames like this can only be achieved with a wood-burning pizza oven.

Vomero's 2 cm thick cordierite pizza stone stores heat and bakes perfectly crispy pizzas. Thanks to its thickness, the stone stays hot for a long time. This lets you you can bake one pizza after another with Vomero without having to worry about reheating the stone. The temperature of the oven quickly rises to over 500 °C, cooking the pizza in an instant. You need to have quick hands as you rotate the pizza in the oven.

You should approach making the pizza dough with sufficient patience to have the desired end result. The longer the dough is allowed to rise, the more flavor, air bubbles, and structure the dough will have.

A carefully prepared pizza dough can withstand handling. The gluten in the dough makes sure that the base can be stretched to the desired size and shape. Start working on the pizza dough by covering the table with flour. Also, put a good amount of flour on the dough ball, preferably durum or semolina. Start by pressing the middle of the dough ball toward the edges with your fingers. Once your palms fit in the middle of the dough, you can start stretching it on the table by pulling in opposite directions. The outer edge of the dough should remain untouched throughout the process. Otherwise, the crust can't rise properly during baking with all the air bubbles pressed out. Finally, you can lift the dough off the table on the back of your hands and stretch from the middle toward the edges a couple of times.

The widest range of accessories:

Mustang pizza accessories:

612093 **pizza stone**, 612092 **pizza stone rectangle**, 611926 **pizza dough rising box (L)**, 612123 **pizza dough rising box (S) + lid**, 611859 **dough spatula**

Mustang Dome (610603)

Mustang Dome is a wood-burning pizza oven made from ceramic mullite clay. Many know mullite clay from Mustang Kamado grills. The clay withstands huge temperature changes and stores heat. A perfect combination for a pizza oven!

Burn wood evenly on the floor of the pizza oven until the oven is heated up. After that, move the embers to one side of the oven, and the oven is ready to bake some amazing pizzas. Place a log on top of the embers to create a flame as it burns. This flame will travel across the ceiling of the oven to the other side, where you bake your pizzas. The flame cooks the pizza toppings. The wood-burning oven gives your pizzas a wonderful smoky aroma. You can bake your pizzas directly on the floor of the Dome oven (provided that you carefully clean it of ashes) or on a separate pizza stone. Mustang Dome comes with a long cleaning brush for cleaning the oven floor without having to worry about singeing your arm hairs.

Mustang pizza-oven trolley (610604)

The Mustang pizza-oven trolley is designed to withstand high weights, making it an excellent accessory for the Dome pizza oven. It features fasteners that keep Dome in place as you move it. Of course, the trolley is excellently suited to smaller pizza ovens as well.

Mustang pizza oven for gas grill (313247)

With this pizza oven, you can turn any gas grill (that the pizza oven fits) into a genuine pizza oven. The structure of the pizza oven is designed to absorb the heat of the gas grill and focus it into the pizza stone of the oven. When the thermometer of the gas grill shows a temperature of around 250 °C, the temperature inside the pizza oven will be close to 400 °C. The pizza stone of the oven gives you a crispy pizza crust, while heat reflected from the ceiling cooks the toppings.

Mustang pizza kit (604024)

The Mustang pizza kit is the perfect choice for a novice pizzaiolo or an excellent gift, for example. The kit comes with a pizza spatula with a folding handle, a Ø 32 cm pizza stone and a rolling pizza-cutter.

Pizza-oven-cleaning brush (612116)

Pizza ovens and stones require regular cleaning. Extra flour has to be wiped off the stone to prevent it from burning on. Mustang's pizza-oven-cleaning brush with a folding handle is made for precisely this purpose. It also features a scraper at the end, with which you can scrape off any tomato sauce that has splashed onto the pizza stone.

A wide variety of delicious pizza toppings can be found for many tastes and, in addition to traditional savory pizza, sweet dessert pizzas have emerged among pizza-makers.

For the dessert table:

Prepare the pizza dough and shape the pizza bases from the well-raised dough.

See our easy instructions for pizza dough: mustang-grill.com/en/recipes/pizza-dough-different-rising-times/

Bake only the pizza base in the Vesuvio or Vomero pizza oven for approx. 1–2 minutes, rotating them to guarantee even cooking. The temperature of the oven should be 420-450 °C. Check the temperature of the pizza oven with Mustang's own infrared temperature gun. When the pizza bases are ready, pour some chocolate sauce on the base and add dollops of Mascarpone or vanilla ice cream.

Garnish with fresh strawberries, make the flavor pop with a pinch of salt as a finishing touch, and enjoy!

The widest range of accessories:

Mustang's new pizza spatulas and cutter: 613115 **pizza-cutter**, 612094 **bamboo pizza spatula**, 612121 **turning peel (premium)**, 614798 **pizza spatula (premium)**, 605911 **pizza spatula (long)**

Mustang pizza spatulas

To bake a perfect pizza, you need a pizza spatula for placing the pizza in the oven and taking it out. Mustang has an extensive range of pizza spatulas. The pizza spatula with a folding handle **(274191)** takes little storage space. Also, our spatula with a long handle **(605911)** has gained a lot of popularity.

In the 2022 season, Mustang is introducing the premium-range of pizza spatulas. These pizza spatulas have a coated and perforated surface. This significantly decreases problems with the pizza dough sticking to the spatula. Thanks to their beveled edge, the spatulas slide easily under the pizza. The perforation also efficiently removes loose flour from the bottom of the pizza. The premium-range pizza spatulas are available in three widths, to suit differently sized pizza-oven doors and pizza stones. Widths are 30 cm **(612118)**, 33 cm **(614798)**, and 40 cm **(615095)**.

The pizza must be rotated in the oven as it bakes, to guarantee even cooking. The best and easiest way to rotate a pizza inside the oven is to use a so-called rotating spatula. Mustang is now launching a premium pizza-rotating spatula **(612121)** with a Ø 18 cm peel.

The Mustang bamboo pizza spatula **(612094)** is an excellent tool for handling a pizza. You can use it not only to place pizzas in the oven and take them out but also as a cutting board and a striking serving dish.

Mustang rising boxes (S 612123, M 612122, L 611926)

Making a pizza dough is an art. For a perfect dough, the required rising times depend on whether you let the dough rise quickly in a warm environment or slowly at a cooler temperature. Both methods are correct.

The dough needs a container for rising. Mustang is introducing rising boxes designed for this purpose. They are made from food-grade plastic, meaning that you can apply olive oil to them without having to worry about harmful compounds being released from the plastic into the pizza dough. Also, the corners of the boxes are rounded to prevent the dough from sticking to them.

These rising boxes are available in three sizes. The size S rising box **(612123)** is intended for one large dough ball or two smaller ones. The size M rising box **(612122)** comes with a lid and can easily hold 12–15 dough balls, depending on their size. Boxes in the M size class can be stacked on top of one another. The size L rising box **(611926)** consists of two stackable boxes and a lid. With this combination, you can already run a small pizzeria.

The S and M rising boxes fit in a normal household fridge. The L box requires a larger fridge or a cold room. All the rising boxes are suitable for other food-storage purposes too.

Mustang dough spatula (611859)

With the Mustang dough spatula, you can easily turn and chop your pizza dough or lift risen dough balls out of the rising box. The spatula is suitable for other baking-related purposes also.

PIZZA

product details on pages 54–59

In addition to perfect pizzas, you can use the pizza oven to cook vegetables, steaks, bread, buns, pies, and virtually anything that requires a high temperature.

Napoli is an excellent oven for cooking other foods as well. Napoli and Dome can fit larger cast iron pans and pots. How does a Dutch oven bread with a slight smoke aroma sound? Or how about Italian-style meatballs in tomato sauce or slowly braised mutton shanks?

Mustang Vesuvio 12 and Vomero 16 are not just simple pizza ovens. Just as the Napoli and Dome models, Vesuvio and Vomero can be used for other types of cooking as well. Just replace the pizza stone in the pizza oven with a griddle pan (316743) and the oven becomes ideal for frying steaks and vegetables.

The sky is the limit:

Mustang Multigrill pots and pans:

325435 cast iron pot, 327531 cast iron pan set,
603435 cast iron pan, 603438 cast iron wok pan

Mustang digital scales (615272) (611861)

A perfect pizza dough requires measuring all the ingredients precisely. Mustang's product selection features two scales for this purpose. The digital pizza scale (615272) is the perfect choice for a pizza-maker. It has two separate measurement areas. The smaller area is intended for high-precision measurements. Its measuring range of 0.01–500 g is suited particularly well to measuring dry yeast. The measuring range of the larger area is 0.5 g–5 kg, intended for measuring flour and water. Of course, the use of the scale is not limited to measuring pizza dough ingredients. The scale is suitable for measuring any cooking ingredients. The Mustang kitchen scale (611861) is highly suitable for measuring flour and water for making a pizza or other dough. Its measuring range is 2 g–5 kg. The scale is suitable also for measuring other cooking ingredients.

Mustang pizza stones

Mustang has a wide selection of pizza stones, in various sizes, to suit every need. Made of cordierite, the pizza stones store heat well and give you a crispy crust. The selection features round Ø 30 cm, Ø 32 cm, Ø 35 cm, and Ø 42 cm pizza stones, as well as a rectangular 30 x 38 cm stone.

Mustang cooling rack (611856)

Take the pizza out of the oven and place it on the cooling rack for a moment. This will cool down the crust, preventing the tomato sauce from making it soggy. Of course, the best way to prevent a soggy crust is to eat the pizza right away. The diameter of the Mustang cooling rack is 32 cm.

Mustang infrared temperature gun (611808)

One of the most important tools of a pizza-maker is an infrared temperature gun. The temperature of the pizza oven and the pizza stone in particular must be measured, which is impossible without such a device. Mustang's own infrared temperature gun displays temperatures up to 550 °C, making it one of the few devices capable of measuring the temperature inside a super-hot pizza oven. The temperature gun is also suitable for construction use, and you can use it for purposes such as measuring temperatures in the corners of your house if you suspect heat leaks.

Mustang pizza-cutters (604021, 613115)

After baking, you need to cut your pizza into slices before putting it in your mouth. Mustang offers two pizza-cutters, of different styles. You can choose the style you prefer.

The rolling pizza-cutter has a Ø 9 cm blade. The knife-style pizza cutter features a wooden handle that gives you a firm grip. Wash only by hand.

Cooling rack (611856)

Infrared temperature gun (611808)

Roller-based pizza-cutter (604021)

Fire therapy

stunning outdoor fires in the privacy of your own backyard

MUSTANG'S ENTIRE PRODUCT RANGE:
BEGINNING ON PAGE 36 AND AT
mustang-grill.com/en

What could be more relaxing than sitting by a fire at dusk and staring at the flames? There is something mystical and magical about fire. It attracts us so strongly we may not even notice how much time has passed as we have been enjoying the moment. You can create this magical moment in your backyard with Mustang outdoor grills, fire pits, and fire baskets. Our extensive selection features products that are suitable for relaxation and cooking alike.

A striking new outdoor grill for the 2022 season: Mustang Malibu (613141) is suitable for both cooking and enjoying the magic and warmth of fire. The grill combines a stylish appearance with practical cooking. The Ø 90 cm stainless-steel grilling grate waits for food to be cooked. If you want to just enjoy fire and heat, you can remove the grate. The legs of the grill are adjustable. At a 60 cm height, the grill works excellently as a fire pit, but when you add extensions to the legs, the height increases to 90 cm, which is greatly advantageous for grilling. Most Mustang Multigrill accessories fit the round hole of the grilling grate. You can also watch the flames dance through the Mustang logo.

Mustang Oakdale (601849) is packed with style and attitude. The middle of its stainless-steel grilling grate features a round hole waiting for Mustang Multigrill accessories. Oakdale also serves as an impressive fire pit. The legs can be adjusted in accordance with the intended use. The flames dancing behind the laser-cut Mustang logo make for great social-media pictures.

Mustang Pavilion (603419) truly catches the eye and generates atmosphere. Its appearance features a dash of eastern mystique.

The Pavilion unit's side walls serve as a spark shield, preventing sparks from reaching the surroundings. You can enjoy the atmosphere safely. You can also grill something to snack on while enjoying the atmosphere. Pavilion is excellently suited to cooking as well. It comes with a Ø 30 cm cast iron grate that can be set to either of two convenient heights inside the fire pit.

The **Mustang Livingston (602176)** fire pit is simply gorgeous. The large fire pit allows you to relax beside an impressive campfire. The spark shield holds hot chips safely inside.

The Mustang Livingston has a large 74 cm grilling grid for easy cooking on summer evenings and holidays. The elevated fire pit is easy to position solidly in the garden or by the water beside a summer cabin.

Let's eat out –

a gourmet dinner for four by the outdoor fire

STEAKS WITH SPICED BUTTER

*approx. 200 g of beef per diner
(sirloin steak or fillet, entrecote, etc.)*

200 g baby asparagus or broccolini

200 g mini truss tomatoes

200 g fresh chanterelle mushrooms

oil for cooking

150 g butter

1 clove of garlic

2 tbsp chopped thyme

a pinch of black pepper

Take the steaks out of the refrigerator roughly one hour before grilling. Prepare the spiced butter. Microwave the butter for approx. 10–15 seconds to soften it slightly. Mix in chopped garlic, thyme, and a pinch of black pepper.

Heat the grill. Grill the chanterelles, asparagus or broccoli, and tomatoes for approx. 5 minutes, turning occasionally. You can season the vegetables with salt and pepper toward the end of cooking. Coating with melted spiced butter also adds a nice touch.

Depending on their thickness and the desired doneness, grill the steaks for approx. 1–3 minutes per side and season with salt and pepper. You can spread spiced butter onto the steaks toward the end of grilling or complete the dish with butter on the plate.

Grill pan with folding handle (263796)

Fire basket Fresno (612477)

Fire baskets have become highly popular across Scandinavia

They are particularly suitable for winter use. What better way to welcome your guests than with an open fire burning in an impressive fire basket on both sides of the path in your yard? You could call them modern Swedish torches.

Mustang Fresno (612477) and **Mustang Redding (612476)** are fire baskets designed especially for this purpose.

Note: If you use fire baskets in summer, please note that the open structure will cause hot ashes to fall to the ground. Use only on heat-resistant ground.

A campfire in your own yard!

The **Mustang Easton (604327)** fire pit is a versatile solution. The grilling grid features an opening for Multigrill accessories. Mustang Easton is like the fire pits at lean-tos, guaranteeing the perfect camping atmosphere in your own yard. This impressive open fire pit is easy to use all year round at home or at a summer house.

The **Mustang Del Ray (604344)** is a low-key, modern fire pit for stylish grilling. The fire pit has a removable 56 cm grilling grid for the easy cooking of vegetables and sausages to your liking.

The Mustang Del Ray fire pit is slightly raised off the ground, so its base cannot damage the decking or paving below. This means that the fire pit is a perfect fit for decks and gardens. You'll love to spend time around this fire pit enjoying delicious food or just admiring the flames.

The **Mustang Lemoore (603991)** fire pit is a robust fire pit for the yard or garden. This fire pit can be used with wood, coals, and briquettes.

This fire pit allows you to enjoy atmospheric moments just like those at a real campfire but safer. The stylishly simple fire pit is slightly raised from the ground so that its hot base is not in contact with the surface below. Always make sure your fire pit is placed on a non-combustible surface.

The **Mustang Pasadena (613149)** is a modern-feel stylish fire pit. The outer shell looks like concrete but is actually made from magnesia. The material is light but extremely heat-resistant. Therefore, Pasadena is very easy to move around.

It comes with a Ø 43 cm grilling grate, enabling you to use the embers for cooking as well. When you place a spark shield on top of the flames, you do not have to worry about sparks entering the surroundings.

Butcher paper

You prepare succulent and successful BBQ treats with Mustang grills and accessories

When barbecuing meat with hot smoke at low temperatures for a very long time, you have to be sure that the meat does not dry out while cooking. Solution for this is the **Mustang's butcher paper (607766)**, which is food-grade kraft paper. The barbecued meat is wrapped with this paper near the end of the cooking process. Butcher paper keeps the meat moist while also preventing grease and liquids from dripping into the grill. Unlike aluminum foil, the paper is permeated by smoke, which continues to flavor the food as it cooks.

Grills for travel

on the road « **MUSTANG**

Grill in style! **Mustang Nomad (273378)** is a small but powerful portable gas grill. You can always grill in style on the road. This portable grill is not only elegant to look at but also practical to use. It has a sturdy handle and a bamboo cover that doubles as a cutting board or a serving tray. Hold an elegant party in a park or cook a delicious meal on the road. You can store the grill in the handy storage bag.

Novelty of the 2022 season is the **Mustang wall rack for the Nomad gas grill (613150)**, which allows you to set the grill itself on a terrace, on a patio, or even in a boat. Warranty: 1 year.

The **Mustang Trek charcoal grill (325421)** has gained popularity among campers and fishing aficionados. The generous grill surface allows you to cook a meal for a larger group of people. Thanks to the foldable legs, the grill doesn't take much storage space. The grill comes with a practical storage bag. Here is a grill that you can bring along wherever you go.

It's self-explanatory! The **Mustang Travel charcoal grill (602077)** is easy to use and store. You don't have to think twice about bringing it along on your trips. What else could you wish for? no-tool assembly, stainless steel, and a large grill surface. The grill comes with a practical storage bag. Grilling on the road has never been this easy.

Everyone likes a trailer tourist! Especially when you have this **Mustang Caravan gas grill (602132)** and delicious BBQ food. This tabletop gas grill is easy to bring along on a trailer or boat trip. Thanks to the foldable legs and side tables, the grill doesn't take much space. The side tables give you more space to prepare your meal. This grill is easy to use and quick to set up.

Succeed at grilling

Useful tips for enjoyable grilling

With a gas grill that has multiple burners, you can make use of direct and indirect grilling. In general, smaller and softer foods are grilled in direct heat. Indirect grilling is usually applied for large food items that need longer grilling, such as full roasts, chicken, and fish. Indirect grilling is also used for preparing pieces of meat that have been seared through direct heat.

Settings for direct grilling

Indirect-grilling settings

Grilling is very easy and relaxing once you keep a few rules in mind and make use of these general grilling instructions:

- The grill must heat up properly. Once the grids are sufficiently hot, food sticks to them less and the foods get a proper grilled surface.

- Do not grill with dirty supplies. Old marinades and food scraps easily stick to the grid and the food. Clean the grill and the grids after each use. This way, they are ready for the next grilling session.

The grill grid and the grilling plate are cleaned by burning any grease, marinade, and leftover food to ashes. Let the grill cool down, and clean with a grill-cleaning brush.

- Grill with the hood closed as often as possible. When you grill with the hood closed, the grill's temperature does not decrease unnecessarily, and grilling is quicker.

- Flip the meats as little as possible; once is sufficient. When the food is allowed to cook slowly on the grill/grid, it gets a nicely seared surface.

- Use a thermometer! If you grill the food for too long, the food will become dry and lose its flavor. You can achieve the best results if you also get a meat thermometer.

- Let the meat rest for 10–20 minutes before cutting/serving it. While the meat sits, its temperature becomes more even, and the juices do not flow out excessively when you cut the meat.

Cleaning is next to godliness

The grilling plate **cleaning pad with water tank (612117)** is a new product for the 2022 season. Spray some water from the tank onto a warm plate; the vaporizing water will remove dirt efficiently.

The second new product introduced for the 2022 season is the **microfiber cloth (611876)**, which is very efficient in fighting dirt when combined with the grill-cleaning fluid. Use the cleaning cloths to wipe the outside surfaces of the grill efficiently.

A third new product introduced for the 2022 season is the **biodegradable cleaner fluid for grill grids and grilling plates (616839)**. The product is suitable also for cleaning other grill surfaces inside the fire box and grilling accessories. The fluid is effective in loosening greases and food residues. It is suitable also for stainless steel and works well for vertical surfaces. This product boasts the Finnish Key Flag Symbol.

We guarantee that we have the most comprehensive selection of grill-cleaning brushes. There is an option for everyone.

Protecting the grill and its surroundings

Nothing deflates the mood like pollen covering your grill or a little message left behind by a bird. Protect your grill with a cover, and keep it clean and ready to use.

Protect your deck from grease and marinade splashing from the grill with a Mustang grill mat placed under your grill. The fire-resistant mat can also be used under a charcoal grill. If hot ash or a spark falls on the mat, it will go out without setting fire to the mat.

Grill-cleaning brush with water tank (612117)

BBQ cleaning brush Triple (286924)

Introducing Mustang's social-media influencers

Chef Oskari Lahti

Mustang has been highly active on various social-media channels for a few years now. Social media-followers have enjoyed, one after another, more delicious grilling pictures and videos both in Finland and in our neighboring country Sweden. In 2022, operations were further streamlined, and, for example, new English-language channels were opened.

Our Mustang faces: Oscar and Calle

In Finland, chef Oskari Lahti has been behind production of social-media content, delighting his followers with videos and recipes. Oskari, who has already become familiar to many from YouTube, has in his unique jovial way brought various grilling and other professional cooking methods to consumers via Mustang's social media.

Since the beginning of 2022, social-media operations have been even more prominent, and, in consequence, Oskari has been a full-time member of the Mustang team. He has taken over the production of social media in Mustang even more strongly both in Finland and through the new English-language social-media channels, where he will continue to create food videos and photos.

In addition to these, he is involved in the design of the visual appearance and communication of various media channels and in an important role as their implementer. Interaction with followers will be another of his areas of focus.

You can also meet Oskari at trade fairs, PR events, and various grill-themed events at Mustang's booth.

If you want to see who chef Oskari is outside his duties, you can follow his personal Instagram account [@chefslife247](https://www.instagram.com/chefslife247)

If you want to see who Calle Svane is outside his duties, you can follow his personal Instagram account [@calle_svane](#)

In Sweden, passionate griller Calle Svane has been behind production of social-media content. He has made Mustang familiar to our neighboring country with his own work and inspired consumers there - for example, to make the perfect smash burger.

Calle is a police officer who loves to explore the gastronomic world in his spare time. He enjoys cooking - especially grilling. Calle has been part of the Mustang team for a few years now and has been influential in social media from the sunny west coast of Sweden.

In 2022, Calle will continue his happy attitude to producing Swedish social-media content with various food videos and images, along with other current updates. Interaction with followers will be another focus of his efforts.

You may find the active Calle in his spare time also in the summer on a motorcycle or in the winter on a hockey break with his friends.

Active brand marketing boosts your sales

Mustang boasts a convenient range of grills and grilling accessories that is being constantly updated, and to which innovative new ideas are being added every year. Mustang offers its distributors a comprehensive range of marketing channels and Finnish- and English-language product support to help with sales.

We take care of brand marketing on your behalf!

GOOGLE ADS – TO BOOST YOUR SALES

Our goal is to influence consumer behavior and our brand image by conducting effective Google Ads campaigns. We will research the search-engine trends of consumers interested in grills and grilling, and we will build ads based on that research. We will take advantage of all Google Ads opportunities: SEM, display ads, re-marketing, and targeted video marketing.

Most consumers search for information online before making a purchase decision. We will reach the consumer at the right moment.

A MULTILINGUAL WEB SITE

The Mustang Web site is built to support and serve customers and our resellers. In addition, it supports the Google Ads campaigns we do. In addition, the product Web site has the best grilling tips and the most delicious recipes.

mustang-grill.com/en

PRODUCT SUPPORT

Mustang's own customer-service staff will support you in your own customer-service work. You can contact Consumer Service if you receive difficult complaints, need spare parts, or have questions about how products work.

STYLISH MARKETING MATERIAL FOR YOUR ADVERTISING

You can download high-resolution product images and inspiring pictures giving the right vibes via our Web store at tammerbrands24h.fi. You do not need store user IDs to download the images and product information.

Upon login to the Web store, you have possibility to download ready-to-use images for your social media.

Vesuvio -pizzauuni
3 322 katselukertaa • 8 kuukautta sitten

Mustang Vesuvio on pöydällä pidettävä kaasukäyttöinen pizzauuni. 2 cm paksu kordieriidistä valmistettu pizzakivi varaa lämpöä itseensä ja paistaa pizzan pohjan rapeaksi. Pizzakiven koko 30,5 x 30,5 x 2 cm. U-muotoisen polttimen ansiosta pizza kypsenty kolmelta sivulta yhtä aikaa. Polttimen teho 2,9 kW. Uunin lämpötila nousee jopa 500 C saakka ja kypsentää pizzan täytteet nopeasti. Taivutuvat jalat. Poltin varustettu ODS-...

See the latest product videos and inspiring videos giving the right vibes directly from YouTube or the TB24h Web store!

ACTIVE SOCIAL-MEDIA CHANNELS

Social media represent a powerful medium in which Mustang engages in strong investment.

- Videos of product demonstrations and instructions for successful grilling.
- Inspirational pictures of the products, grilling, and in-store displays.
- Delicious recipes and grilling tips from Mustang's own chef Oscar.
- Cooperation with the association Pizzanpaistajat ry, of which Mustang is a member. (The purpose of this body, which was behind the pizza boom in Finland, is to develop the pizza hobby in Finland.)
- Monthly raffles in which followers can win great products for grilling.

Mustang

Wok pan 30 cm square

Nonstick steel pan, rotating hardwood handle. Mustang logo on the wooden handle. The holes in the pan allow for the hot air from the grill to cook the contents. At the same time, any excess liquid drains off the pan. The pan is perfect for grilling vegetables and fish. Diameter 30 cm.

230664
2 / 84

Mustang

Cast iron pot 3 L

A sturdy cast iron pot with a fireplace stand and lid. Diameter 25 cm. 5.6 kg. Fire stand and lid. The pot can be used on grills, stoves, wood-burning ovens and open fire, either by hanging above the fire or placing directly on the charcoals. Dry the pot carefully after use – cast iron rusts easily.
