

Inspiring Scandinavian cozyness

# GROW YOUR BUSINESS WITH US

Twice a year, we launch inspiring new products alongside our best-selling classics. We also offer attractive shop-in-shop solutions that boost visibility, attract attention and creates interest in the whole stand. With these concepts, you'll get customers excited and buying more than ever before!

The wooden shelf structure consists of three parts and is easy to assemble. The shelf head structure is directly compatible with Itab furniture. The shelf-edge product is put together in collaboration with the customer, according to the customer's needs and objectives, and is easy to update during the season. The product package can be made by product group or by combining product groups.

**Design a combination that suits your customers with your contact person.**
